

A super quality sharkstooth mesh scrim, particularly recommended for **opaque and transparent effects** highly prized in the theatre. With its hard-wearing, stiff weave, this scrim is highly **resistant to warping** even under tension, making great for **painting**, allowing you to make sensational sets and scenery.

It can also be used as a creative **front-projection** and **rear-projection** screen.

Rated **M1 flame-retardant** and woven in **extra-large widths**, this scrim lets you cover large areas without panel assembly.

Like most scrim materials, it lets sound through, offering perfect acoustic transparency.
